\* From guitars to keyboards, synths and vocals and produce tracks that are full of clarity and power. The proven, all-digital world of GUITAR RIG 5 PRO is now available in a beautiful, limited edition color. Each pedal is hand-made and individually signed by the product team. All five pedals feature the classic solid steel body and metal footswitch housing. Each pedal is individually numbered and comes with a hard case. Connect The 500 series includes the popular REV500, SB500, and the VX500, as well as all-new designs for a new era of pedalboard utility and versatility. The 500 series retains the same essential design, performance, and operation of the original 500, while also offering larger footswitches, higher resolution displays, and improved compatibility. The 500 series also includes several new, custom products not included in the 500 series. The 500 series features the same basic design of the original 500 series, with a beautiful, full-color screen, deep, ergonomic footswitch, and a metal-cast body housing for enhanced durability. On top of that, many of the 500 series also include a space-age OLED display, high-resolution touch screen, and/or full-color LCD display, depending on the product. Along with deeper, more ergonomic footswitches and metal-cast housings, these new products are also rugged enough to take abuse on the road. The 500 series also includes several new, custom products not included in the 500 series. A Limited Edition Color GUITAR RIG 5 PRO is available in an exclusive color. The 500 series retains the same essential design, performance, and operation of the original 500 series, while also offering larger footswitches, higher resolution displays, and improved compatibility. Features Guitar Rig 5 Pro Guitar Rig 5 Pro has built-in tremolo, modulation effects, and more. The top row of effects is perfect for a variety of tasks, including classic tremolo, modulation, and more. The middle row of effects is designed for modulation and time-based effects. The bottom row of effects is ideal for harmonic and subtle delays. There's even a built-in slow motion feature that can be controlled from the G5's pedalboard. The effects on Guitar Rig 5 Pro are all modeled after the original 500 series, but with new improvements in clarity, usability, and ergonomics. 82157476af
