**OS:** Windows XP, Vista, 7, 8, 10

**Processor:** Single Core 2.0 Ghz

**Memory:** 1 GB RAM

English

try hard parking gameplay. try hard parking. try hard parking gameplay. try hard parking

a good combo of car stunts and awesome soundtrack. I recommend. Plus i love that feel of "back-to-synthwave" retro feel to it.. This is some thought experiment gone horribly wrong.. Very hard game yet is fun to play and the retro experience is also very nice.. If you're one of those gamers who like a real challenge, give this game a try. Pros: Gamepad works ingame (DS4Windows

---

+ Bluetooth + Steam) Difficulty! Great visual style. What I'd like to see in the future: In-game leaderboards. Control remapping and gamepad support for menus. More levels. Currently every level can be completed within an hour or two :) I tested this game with Core 2 Duo E4400 OC 3.4GHz, 4GB RAM and Radeon 7850 2GB. Windows 7. No problems at all.. a very fun and addictive game, but a word of warning it contains the trials evolution/fusion effect, that means rage by constantly trying to improve your times or completing some levels, overall 10/10 keep up the good work. Hard with controlling, always falling down.. 10/10 would park again. wish it had multi/lan game, just try it monitor to monitor with a friend.. Really Ragingly Frustrating. Was Recording A Video For YOUTUBE. Got To Level 4. Couple Minutes Later I Ended Up With A Smashed Battery Pack And A Nearly Broken Controller. Over Than That I Can See This Game Going Far And The Miami 80s Sorta Retro Style Is Amazing And Really Like The DeLorean Too.
